

The logo for 'DARKRIDGE SURVIVAL UNHINGED' is centered at the top. 'DARKRIDGE' is in a large, bold, white, blocky font with a black outline and a 3D effect. Below it, 'SURVIVAL UNHINGED' is in a smaller, similar font, also in white with a black outline. The background is a dark, pixelated Minecraft-style landscape with trees and a path.

1.1 Introduction

Oakridge is a unique community. It's not the builds, or the redstone, or our command block creations, or even our custom add-ons that make it what it is.

Oakridge is what it is because of our **community**. We're all **friends** that coexist within an environment **without judgement**, only caring about how we treat each other, and ourselves. We're a group of a few dozen people from all over the world, who are pretty much friends with all other members. On the outside, we're all different people from different places; but here, we're one big family. Nobody is excluded, nobody is treated like they don't belong. **We belong with each other.**

That's what the best part of Oakridge is. With that said, welcome to Oakridge: Survival Unhinged Season 12! The rest of this guide will get you acquainted with the current season. Keep reading below!

1.2 Becoming A Member

If you're a new member:

Congratulations on your application! 🎉

Next, you need to get familiarized with our community. Chat until you level up from **Applicant** to **Prospective Member**. Be patient, this takes time! Specifically, 550 XP (level 5) required; 10-20 XP/msg, 120 sec cooldown.

While you chat, review the following:

The rest of this guide, **#discord_info**, **#announcements**, **#monthly_roll_call**, **#introductions**, and **#about_addons**

Once you level up, admins will vote to decide if you're a good fit for our community.

You should receive an answer within 48 hours. If you don't, feel free to ping the admins in **#ask_the_team**

If you're accepted, proceed to the right →

To join Season 14:

1. **Review** this guide
2. **React** to the **#monthly_roll_call**
3. **Update** your **#introduction** if needed
4. **Verify** that your **discord username** reflects your **gamertag**
5. Once you've read, reacted, and written an introduction, make sure **OakridgeAdmin** is added as a friend on Xbox
6. Ping **@owner** in **#ask_the_team** requesting membership!

Note: If you've completed Steps 1-5 before the season begins, you don't need to ping us. You should be part of the initial round of invites.

1.3 Your First Day

Note: The [Rules and Info](#) and [About Addons](#) channels are not necessarily for memorization. These are created like a wiki, to consult when it's most helpful for you.

Tip: [#community_center](#) is full of projects to join, and [#helpful_links](#) is full of convenient information.

When you first join the Oakridge world:

1. Claim a **starter kit**
2. Claim a **housing plot** by editing the sign
3. Claim a **post box** in the basement of town hall, and make sure you include your address!
4. Explore **spawn town**! See Section 2...
5. **Remember:** you must complete your spawn house before admins will set up a teleport to your main base.
6. Have fun! The season will run for 12-18 months.

If the season's been going for a while... be sure to send a message in [#main_realm](#) before you first join, so you can get a tour!

1.4 Teleports

Teleports are one of Oakridge's most unique features.

A teleport goes from your **Spawn House** to your **Teleport Hub**.

Teleport Hubs can be located at your main base, or a dedicated satellite. Teleport Hubs have a return TP to Spawn, as well as teleports to all of your other builds!

In addition to teleports, we recommend that you link your base to the Nether Hub.

To Establish a Teleport:

1. Set up signs on **both locations** specifying the **destination coordinates**, so we know **where the button is sending you!**
2. Post in [#ask_the_team](#) and we'll get to you within a few days. **Follow up if we forget!**
 - a. We cannot create your teleport if the signs from Step 1 are incorrectly set up.
 - b. We will not set up a teleport to an incomplete Spawn House.

Tip: EAT THE BUTTON!

You'll hear us say this about every button in our world, because they only target entities (all entities!) within 3 blocks.

1.5 Spawners

Survival Unhinged: you'll never see spawners the same way again.

When you break a mob spawner, it will drop as an item for you to use.

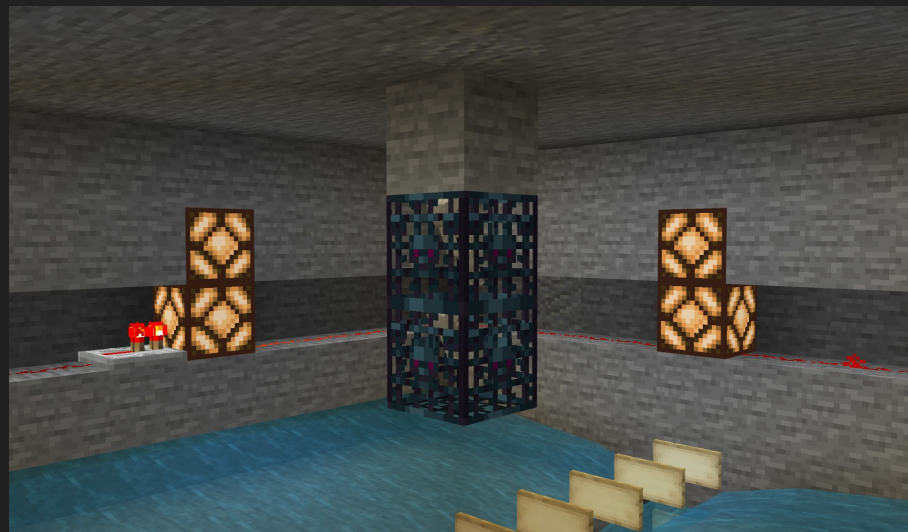

This does not apply to Trial Spawners, only mob spawners.

Mob eggs to fill the spawners with can be purchased from the **Dungeon Master** in the park.

You can also buy additional spawners here - for a cost! Remember, echo shards are craftable on Oakridge.

If the Dungeon Master is missing an egg that you want for a farm, please feel free to ask the admins in [#ask_the_team](#) and we will consider your request.

Note: Some mobs have special spawning conditions – they may only spawn in water, or on grass blocks, or may not disable with light.

Oakridge offers custom monster spawners because it lowers the barrier of entry for mob farms. However, they're not high-efficiency – you can still build a traditional mob farm for the highest rates!

2 SPAWN TOWN

Spawn town is the core of the Oakridge Realm, and it's what truly sets us apart from other realms.

The Oakridge Spawn Town is a sprawling hub of teleports, spawn houses, shops, minigames, farms, and more.

It's a sacred place – no mobs spawn in the walls of spawn town (except deep in the mines). Here, you will know peace.

It's a communal place – teleports from player bases all link back to Spawn, and the many resources bring players back.

It's our home. Welcome.

2.1 Town Hall

Top Floor:

Elytra Takeoff Spot

Middle Floor:

Community Storage (+ Lost & Found)

Note: The Mines and Lava Cauldron storage is in the basement, located in the mechanical room

Ground Floor:

Community Center and Nether Portals

Kitchen (crafting center), library, sleeping quarters, and mementos room

Basement:

Post Office and Utilities

All members must have a mailbox!

It lights up when you have mail.

Utility: Magic Room

Enchanting table, XP exchange, and Gear Mender

30 Levels = 1 Emerald

Mender = 1 Emerald Block; works with gear that has Mending

Utility: Mechanical Room

Special storage, smeltery

Items thrown in a **Lava Cauldron** automatically teleport here

Items thrown in **The Mines Central Pit** automatically teleport here

The Smeltery is chunk-loaded and smelts when anyone is online. Free fuel!

Utility: Financial Room

The Mines, Shop Directory, The Grand Exchange

The Mines are 3 levels, to focus on Iron, Diamond, and Balanced.

Custom traders in The Grand Exchange trade resources at a 4:1 ratio.

Utility: Display Room

Scoreboard displays, Spectator access, Despawn

Beacon access, and Limited Access Teleports

Please contact an admin to gain access to the Supporter Shop if you're a patreon supporter!

2.2 Housing District

1. Housing plots are outlined in **stripped oak logs**.
2. There are 31 total plots, with 3 roundabouts and 8 “joint” plots.
 - a. In the center of each roundabout is a grassy space with a tree. The residents of the surrounding plots should **collaborate** to form their own centerpiece! In the past, we've had pools, fountains, playgrounds, grilling areas, and more. **Be creative!**
 - b. The joint plots are perfect for people basing together or who want to **work together** on their spawn plots. **Have fun** connecting your claims!
3. Each player **must** claim a plot for their spawn house by **editing** the sign provided and adding their name. Spawn houses are **required**, and they will **teleport** you to your base.
 - a. *We will not place base teleports in unfinished spawn houses - we don't want incomplete builds at spawn! If we deem a build at spawn to be abandoned, admins may modify it to feel more complete.*

2.3 Shopping

15 variable-size plots are outlined in Stripped Cherry logs, claim one with a sign.

8 Market Stalls line the roundabout, perfect for selling just a few items that may not expand to a full shop.

2 pre-built, empty shops, perfect if you don't want to build your own shop – but you may not modify the exterior.

As a store owner, you must:

1. Check and restock your store **regularly**.
 - a. Players may visit your farm and pay there if your shop is out of stock.
 - b. One-of-a-kind items like event prizes cannot be sold here.
 - c. Shops are for **collections of items**, such as: Armor trimmer, pottery, bakery, apiary, music, wood, stone, concrete, wool, mob drops, frozen, potions, tnt, underwater, greens, trash shop, redstone, books, weapons, and more...
2. Make a post in [#community_center's Market Catalog](#) and a page in the in-game shop directory for everyone's convenience. Be sure to include an **image** on discord!

Tips:

- Check [#community_center's Market Catalog](#) or the in-game shop directory for a catalog of items available for purchase.
- Currency is interchangeable in the Financial Room at a 3:1 ratio.

2.4 Oakridge Park

🎵 Have a chat on the benches, relax in the gazebo with some music from our jukebox

🌳 Enjoy the custom scenery, meandering between custom paths, trees, and natural caves

🎣 Experiment with Oakridge's enhanced fishing and explore the world by the seas, using the boat connections of our docks

🪦 Mourn the loss of a pet at the pet graveyard :(

🏴‍☠️ Trade with the Dungeon Master, Concrete Paver, and Redstone Engineer

🗺️ Explore the map room and teleport to the adventurer's huts

🧐 Find some secrets scattered all around spawn

Note: This season, the holiday district is located at spawn, in the center of the shopping district. Check the [#community_center](#) for the latest information and events!

2.5 Community District

The community district begins with a LOOP:

Community Teleports are front and center

Communal bases, events districts, and more can get a TP here on request.

Player Quests are rear and center

Player Quests are for special, one-off requests with custom rewards.

For example: "I need 7 stacks of mangrove wood. Reward: 3 elytra"

Farms line the perimeter

These farms are empty to start the season. Players are in charge of running and maintaining these for the communal good!

And the road continues...

A variety of community builds can be built all along the road!

In the past, we've seen Pride Flag Displays, update showcases, and minecart transportation hubs.

At the end is the **Minigames District**

A variety of minigames are brought over each season, but plenty more are still to be built!

Minigames are eligible for assistance from admins upon request.

We highly encourage minigame nights in voice chat!

3.1 Overworld Bases

Oakridge has two types of bases: Main Bases and Satellites.

Main bases **must** be within 2048 blocks of 0, 0.

Satellites may be anywhere within the world border.

We encourage least one teleport (Satellite or Main Base) be in 1024 blocks of 0, 0, to build community.

All redstone **must** be able to turn off.

All bases may be visited **unless otherwise marked**, but nothing should be touched unless it's a teleport.

If you want your base to be private, marked that on your teleport. Admins will still visit. Report trespassers.

TIP: If you don't know a good main base size, we typically recommend starting with **128x128** for main bases and **32x32** for satellites.

Note: Teleports typically link a player's spawn house to their teleport hub at their main base or at a satellite. However, we **strongly encourage** that you **also** connect to the Nether Hub!

3.2 The Nether

The Oakridge Nether Hub is at 0, 115, 0.

North/South: Nether Tunnels

These tunnels are designed for multiple modes of transport.

Players are **encouraged** to connect their **bases and satellites** to our tunnels with beautiful tunnels of their own!

We encourage your tunnels to have horse stables at the end, or a hitching post!

If the Nether is 8:1 scale, does that mean we're only a quarter block tall?

East: Nether Mines

- Nether Mines cap at **500 blocks out**.
- Bed mining **is not permitted!** It creates a lot of mess.
- Pickaxe and TNT mining are **encouraged!**
- If you use TNT, claim 3 unclaimed tunnels and explode the middle one.

West: Open Nether

- Safety is **not guaranteed**
- If you get lost, feel free to link up to the North or South tunnels

3.3 The End

1. The End Dimension opens with the **Community Dragon Fights**, typically 3-5 weeks after the season starts
 - a. You **may not** enter the End before this, even if you find a stronghold
2. To avoid loss of items in the void, keepinventory is **automatically enabled** when any players enter the end dimension
3. **End raids** are fantastic **group events**! Ask admins to set up an official Discord Event and post in [#community_center](#)
4. Members may **request** a reset of the end if the end cities seem few and far between.

4.1 World Border

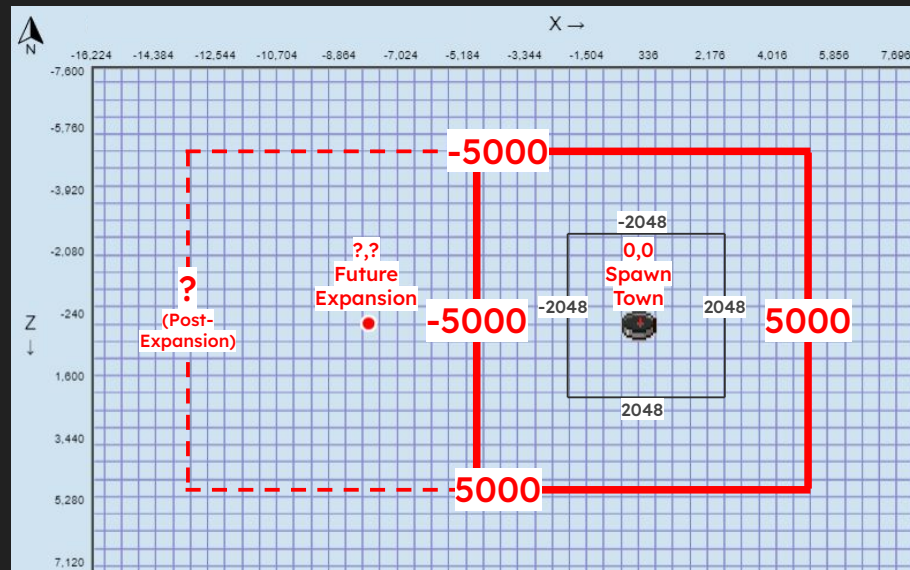

Our main map is a square **2,048 blocks** from 0,0. This is where builds are most highly concentrated, and community is strongest.

All members must have at least one teleport located in the main map, to encourage community.

At the start of the season, the world border is a square **5,000 blocks** from 0,0. Later in a season, we will often expand our border to allow new gameplay.

Exploration past the world border is discouraged unless **absolutely necessary**.

Any builds and progress outside of the world border are **subject to deletion without warning** and any gameplay outside the world border is **strongly discouraged**.

You can find copies of the Main Map(s) in the Map Room, located in the park. We encourage you to place them at your base, so the green arrows appear on the map!

4.2 Adventurer's Huts

Adventurer's huts are placed throughout the world on a grid every 500 blocks from -4500 to 4500.

1. Adventurer's huts are a place to rest and relax after a long day of exploring. If you visit one, fill out the log!
2. Each adventurer's hut has a return teleport to the map room at spawn.
3. The map room at spawn (located in the park) has a grid to teleport you to any adventurer's hut.

4.3 Assisted Fun

On Oakridge, having fun is our top priority. If you need admins to help with anything, request services in [#ask_the_team](#)/DMs and provide relevant details.

Build Help: You may make specific requests for help with builds, including our custom traders, or hard-to-obtain blocks.

Examples include spawn eggs/command blocks for our Dungeon Master, and access to Bedrock or Barrier Blocks.

In special cases, creative mode may be granted, but it may not offer an unfair advantage.

Minigames Help: To encourage more Minigames, the resource cost of them **can be subsidized** by Admins **if the community cannot provide.**

Command blocks are also available on request.

Also: Admins set up events using Discord's Events feature, make teleports, maintain spawn, and monitor the realm and fix issues as they arise. You can also ask for the realm seed, with reason.

Realm Events: All members can set these up, but Admin assistance is available as-needed.

For example, Wither Fights and Dragon Fights require an admin's presence. Minigame nights, caving tournaments do not. Admins are available to invest in prizes for events upon request.

Despawn Beacon: Thanks to BSavage81, Oakridge has a custom entity called a Despawn Beacon, which despawns all hostile mobs in a 48 block radius sphere around it. These are slow, but offer rudimentary base protection.

Get a spawn egg for one in the Display Room. When placing it, be sure that the entire 48 block radius is yours - the circle **must not overlap** with anyone else's farms or builds without their approval.

If you exploit any of these services, you will be **severely punished** with **no exceptions**. These are meant to make the game more fun, **not to provide an unfair advantage.**

4.4 Memorials

Loss is a painful thing to deal with, and as a community, we're here to support you. However, death and memorials are sensitive subjects to stumble upon and we must be conscious of that.

1. Loss of **in-game pets** is treated more lightly and may go in our Pet Cemetery at spawn
2. All Memorials for **Minecraft-related** deaths that members feel they need to build on the realm to work through their grief must be built at a satellite that is **further than 1024 blocks from Spawn**
3. All Memorials for **non-Minecraft related** deaths that members feel they need to build on the realm to work through their grief must be built at a satellite that is **further than 2048 blocks from Spawn**

Note: Teleport signs to these satellites must include **"TW: Memorial Site"** or something similar.

4.5 Community Support

To help pay for community expenses and donate to those who help with our addons (ex: BedrockTweaks), Oakridge has a Patreon, where each tier has some benefits. We NEVER expect anyone to support us, but for those who do, we wanted to make it worthwhile.

Patrons get Behind-The-Scenes Channel Access:

Discussion about add-ons, event planning, and season seeds.

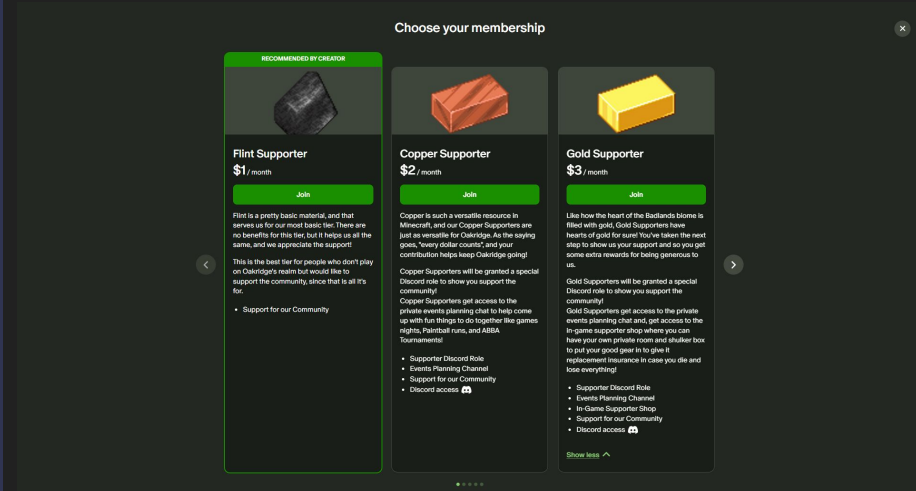

Patrons also may: help work on spawn town pre-season, get assistance on custom add-ons, & access an in-game supporter shop for gear insurance.

Similar to Content Creators...

Oakridge doesn't have the capacity to open our decisionmaking process up to the entire realm. However, as many content creators do, we welcome our supporters to join the Admins and Veterans in our internal channels.

We do our best to balance everything so that it **does not offer an unfair advantage**, while still demonstrating our appreciation for the support.

If you're unable to support us, please don't worry. We never want you to feel like you're missing out. If you feel that way at any point, please reach out and let us know how we can improve equity.

For more details, you can view the
patreon and support the community at:
<https://patreon.com/oakridgemcrealm>

4.6 Miscellaneous

1. When building something with many entities, armor stands, item frames, chests, or similar, **please** be wary of the lag that these all create, especially when they're clustered together in large numbers.
2. All farms should be able to be turned off. Please be prepared for admins to make lag-reducing changes if we find any issues.
3. Personal Farms that are used to stock a shop should have marked storage that is accessible to the public in case your shop runs out of stock. Members must still pay you for this.
4. Wither farms may be fought solo (rather than as a community event) but an admin must still be present. In the event that the wither is at risk of damaging builds, or if the item drops are killing the realm's performance, admins will step in.

5.1 Notes

1. Breaking rules will result in punishments determined by the Admin Team.
 - a. Punishments include but are not limited to:
 - Timed in-game jailing
 - Timed kick from realms (including loss of inventory and/or ender chest)
 - Permanent banishment from realm (including the blacklisting of your name with partnered realms)
2. The rules in this section are not comprehensive – you must also abide by all standards stated earlier in this Rules and Info guide. Please refer any conflicts to the admin team for a response within 48 hours.
3. In addition to these rules, the Oakridge Discord Server has dedicated rules stated in [#discord_info](#).
 - a. The Discord Rules also apply to the in-game chat on Oakridge Realms.
4. In addition to these rules, Oakridge follows the official Minecraft Community Standards.
 - a. Review at: <https://www.minecraft.net/en-us/community-standards>

5.2 Forbidden Conduct

1. Using toolbox or hacked clients.
2. PvP without both parties' consent.
3. Killing named animals (other than your own).
4. Bullying, excessive trolling, excessive pranking.
5. Thieving, griefing, duplicating, exploiting bugs, sharing accounts.
6. NSFW content, discussions of religion, race/ethnicity, or politics.
Discussing human rights (EX: disability, LGBTQ+) are not politics.

5.3 Proper Etiquette

1. If you accidentally strip a log on a build, you must replace it as soon as possible.
2. If specifically requested not to sleep, or to sleep, you must heed the request.
3. Crops must be replanted and not simply taken. This goes for bases, villages, and more.
4. Do not build into other peoples' spaces (plots, bases, satellites, etc.) unless agreed upon.
5. Do not visit another player's base if the teleport sign requests that you stay out.
6. Follow the Discord Rules in in-game chat.

5.4 Required Behavior

1. Rename **all** tools and armor to be identifiable as yours.

If you do not rename your gear, it is not required to be returned to you in the event of a death.

Renamed gear, if found, must be left in the lost and found (in the community storage) or in the player's mailbox.

2. Boss fights (Ender dragon, Wither) are **community events**, contact admins to run one.

Wither fights may be fought solo, but admin presence is still required. You may coordinate with admins in [#ask_the_team](#).

3. Personal Farms (crops, mobs, raid, bartering, etc.) that are used to stock a shop should have **marked storage** that is accessible to the public **in case your shop runs out of stock**. Members must still pay you for the stock they take from the farm storage, at your shop.

4. Oakridge has a "**Finish The Tunnel**" policy in community mines. You may claim as many tunnels as you'd like, but you must cap your tunnel to 500 blocks away and collect **all** ores **before** mining a new one. Excess can be traded with bankers or put in community storage! Poke holes are **prohibited**.

5. For personal mines, you must be aware of your neighbors. If you expect to dig under their base, coordinate with your neighbor **before** mining in that region.

6. All mining of sand, red sand, and terracotta must be completed in the dedicated mining mesa and desert areas.

5.5 Disclaimer

We will always be looking for feedback on all systems in Oakridge, and we welcome (and encourage!) continued conversation about them. Please never hesitate to ask clarifying questions or suggest changes to the rules, but understand that all rules and guidelines on Oakridge have been established for a reason.

While we have no control over what you say or post in spheres outside of Oakridge, we thoroughly value our community's livelihood. Posts in other servers or social media that the admins believe may endanger our community will be evaluated under Oakridge's standards of kindness, and reported per platform standards.

*These rules are not up for debate. Their enforcement is up to the admin team,
and decisions are not likely to be changed.*

*Your presence in this community implies accepting these rules, including all further changes.
These changes may be made at any time without notice,
it is your responsibility to check for them.*

DAKARIDGE

SURVIVAL UNHINGED

Rules and Info

Thank you for reading our Rules and Info. **Everything** that we do and set up has our community in mind, and we thank each and every one of you for sticking with us and being the best friends we could ever ask for.

Season 14 Guide
